

ComVi Enteral Colonic Stent [Flare-Type]

for intrinsic and/or extrinsic malignant colonic stricture

Features

- **Triple layered construction: A biocompatible PTFE membrane tube is held between the inner and outer mesh**
 - An uncovered proximal flare end to reduce migration
 - The PTFE membrane prevents the risk of tissue invasions
- **Large diameters (up to 26mm)** are loaded into a 10.5Fr delivery system
- **Minimum foreshortening** for accurate stent placement
- **Radiopaque marker: 3 (three)** at the Flared end and **2 (two)** on both ends of the body

Ordering Information
